📍 Gaya, Bihar, 823001

Summary

Backend-focused Computer Science undergraduate with hands-on experience in Java and Spring Boot application development. Skilled in REST API design, database management, and problem-solving. Actively seeking internship or entry-level backend roles to contribute to scalable and efficient software systems.

Skills

Languages: HTML, CSS, Java

Backend: Spring Boot, REST APIs, Spring Security, JWT, JPA, Hibernate

Database: MySQL

Tools: Git, GitHub, Docker, Postman

Core Concepts: Data Structures and Algorithm, OOPs, Multithreading, Database Management

Education

B. Tech

Dr. A.P.J. Abdul Kalam Technical University
(2023 - Present)

Greater Noida, Uttar Pradesh

Intermediate

Bihar School Examination Board

Mar 2023

Gaya, Bihar

Matriculation

Central Board Of Secondary Education

Aug 2021

Gaya, Bihar

Projects

1. Fitness Tracker Backend Application

Tech Stack: Java, Spring Boot, Spring Security, JPA, MySQL

Created a fitness tracking backend using Spring Boot and MySQL to manage workout logs, calorie tracking, and user progress through secure and optimized REST APIs.

2. College ERP Backend System

Tech Stack: Java, Spring Boot, Spring Security, JWT, JPA, MySQL

Developed a secure College ERP backend using Java and Spring Boot to manage student records, attendance, events, and role-based authentication with structured REST APIs and database integration.

3. Multi-Vendor E-Commerce Backend Application

Tech Stack: Java, Spring Boot, PostgreSQL, Spring Security, JWT Authentication, Docker, Git, GitHub, Razorpay

Built a scalable multi-vendor e-commerce backend with Spring Boot, supporting authentication, product management, cart, orders, and Razorpay payments using secure JWT-based APIs and PostgreSQL.

4. Shared Wallet & Expense Management System

Tech Stack: Java, Spring Boot, JPA, MySQL

Designed a group expense backend enabling shared deposits, balance tracking, and atomic transaction handling to ensure financial consistency across users.

Achievements & Technical Activities

- Published Research Paper: "Beyond the Myth of Linear Sorting: A Deep Dive into the $\Omega(n \log n)$ Constraint" – Analysis of theoretical lower bounds in comparison-based sorting algorithms.
- Ranked Top 10 in MIH 2.0 (Mind Installer Hackathon) among multi-state participating teams.
- Qualified for Smart India Hackathon (SIH) 2025 – College Level Round.
